

TECHNOLOGY TO MODERNIZE EMERGENCY RESPONSE AT PUBLIC EVENTS

William Roy Pawson – Founder

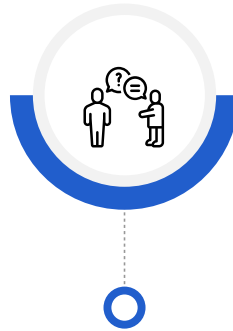

THE PROBLEM

Emergency Response is Losing the Race Against Time

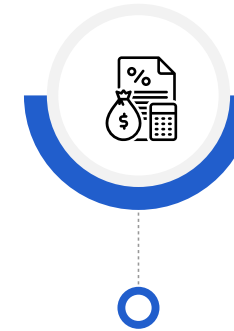

Victims wait up to 12 minutes at major events before help arrives

Responder coordination is manual, slow, and error-prone

No patient context, GPS, or real-time communication

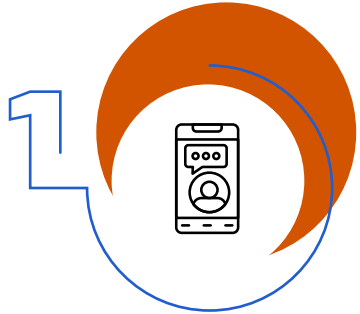

Paperwork is messy, duplicative, and risks liability

“Every minute without care increases harm and uncertainty.”

OUR SOLUTION

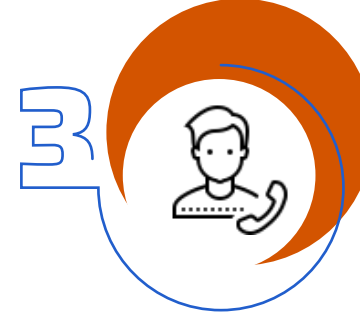

Mobile-First Platform Connecting Victims and Responders Instantly

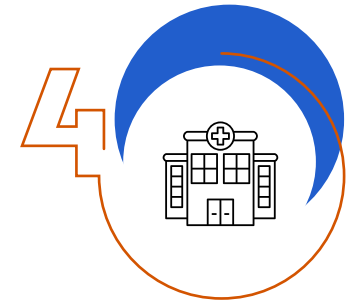

Victim triages and requests help in-app

Nearest responder(s) alerted automatically

GPS + medical info delivered instantly

Digital logs and direct hospital handoff

Built by responders, for responders.

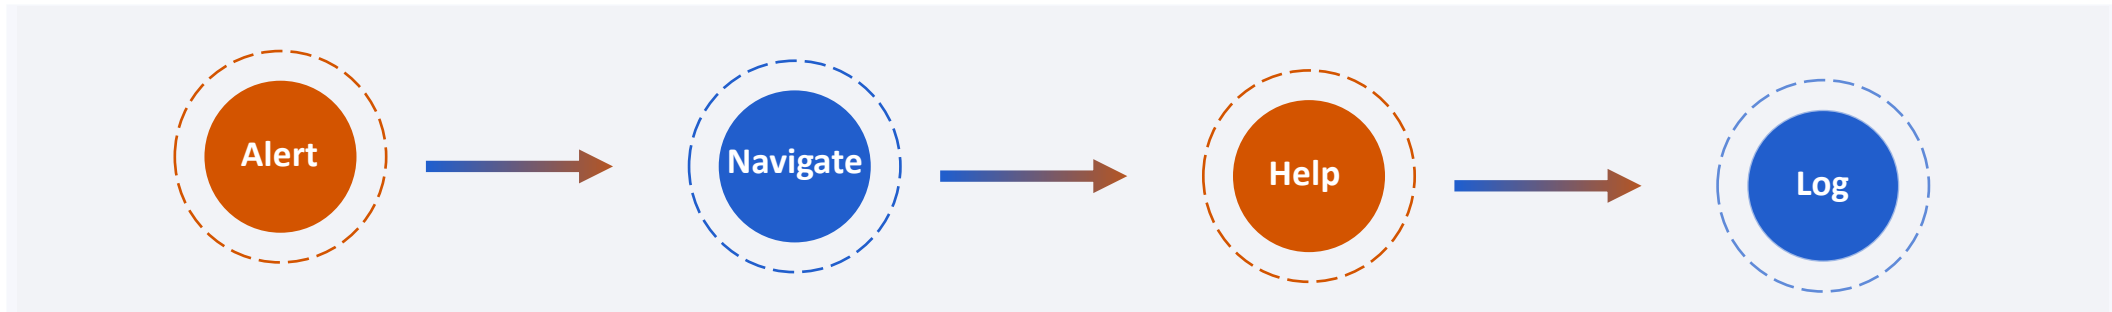

HOW IT WORKS

Two Apps. One Mission. Save Lives Faster.

Public (Scavenger App):

Responders (EventSafe App):

WHY NOW

Public event volume is rising; so are risks

Responder burnout is increasing

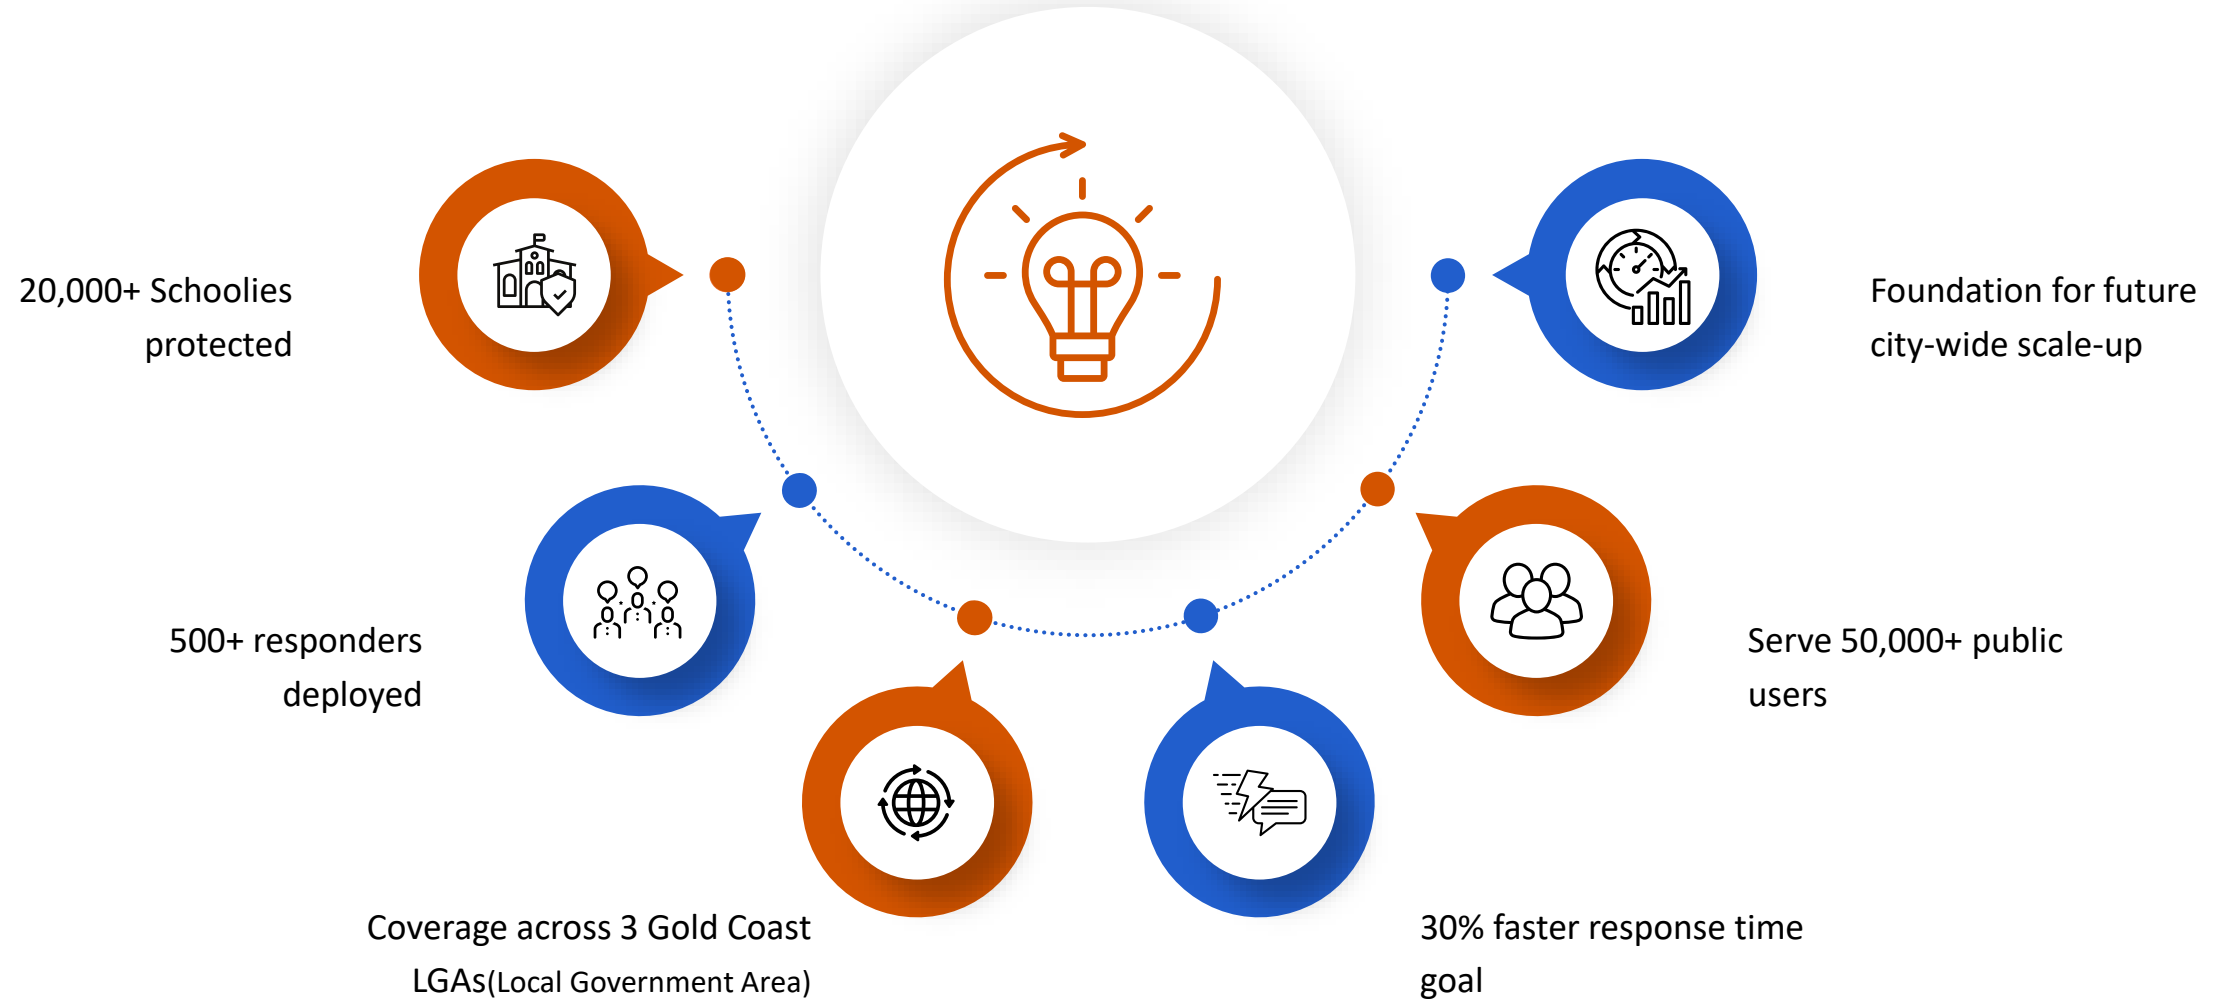

Real-time mobile coordination is now standard in other industries

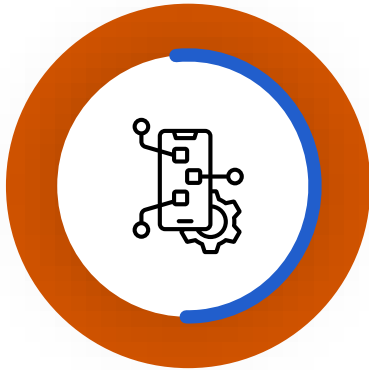

Government safety grants are favoring digital innovation

PILOT ROLLOUT – SCHOOLIES 2025

THE TECHNOLOGY

Fast. Simple. Secure. Field-Tested.

Native iOS & Android
apps

Live encrypted
communication

Turn-by-turn GPS and
medical data

HIPAA-ready backend

Tested in controlled demos—ready for live pilots.

PARTNERS & COLLABORATORS

Red Frogs
Australia

Queensland

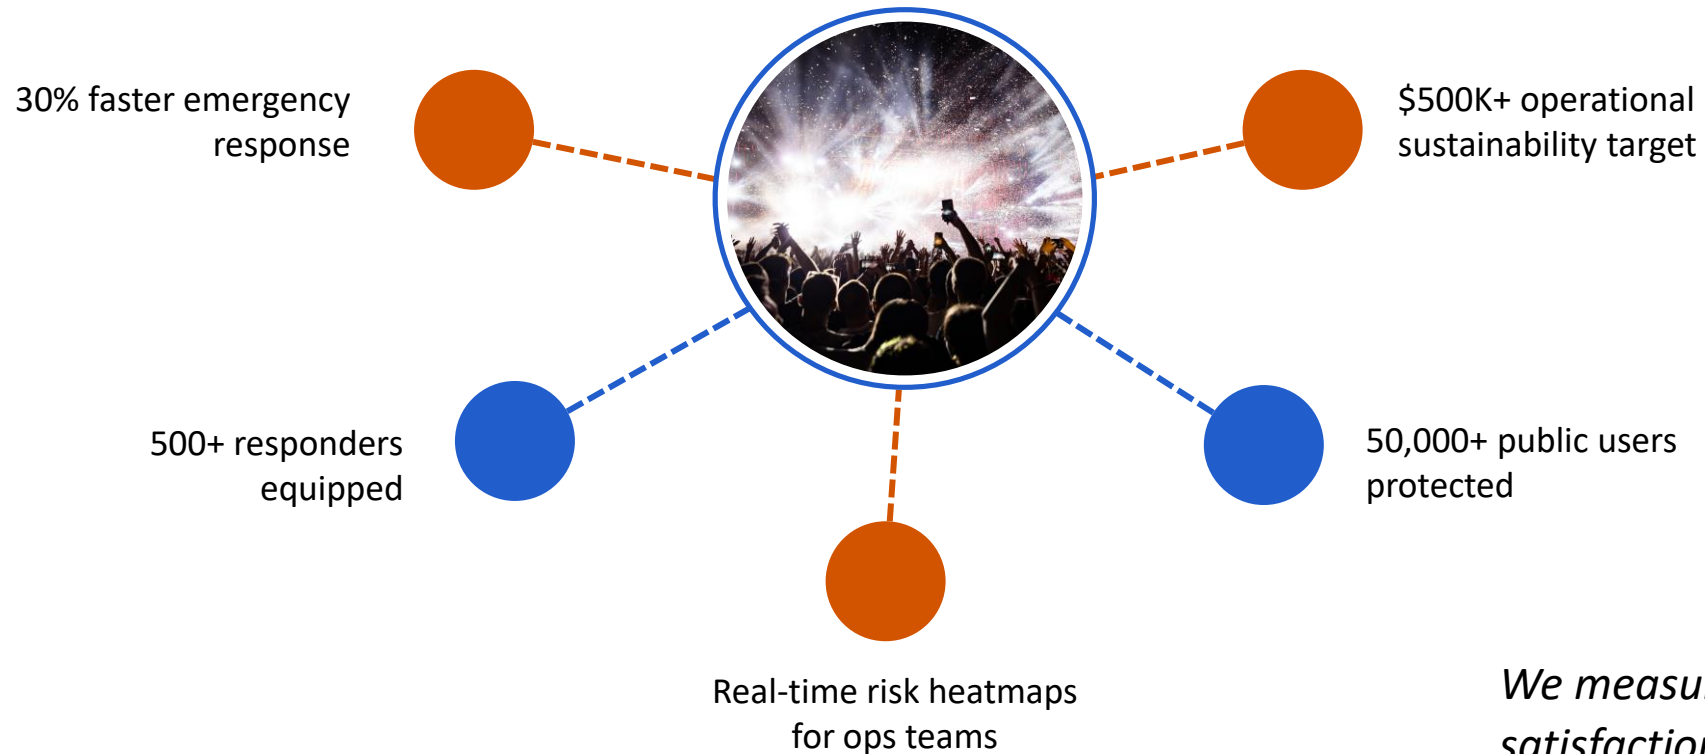

Surf Life Saving
Queensland

Event safety teams
across Southeast QLD

Seeking pilot collaborations with councils and NGOs.

IMPACT & METRICS

We measure success by speed, satisfaction, and safety.

JOIN US IN SAVING LIVES

"I worked on the front lines in Ski Patrol, where every second counted. EventSafe is the system I needed—but didn't have. I built this platform to give every responder the tools to save lives, faster."

William Roy Pawson, Founder, EventSafe Foundation
